Nasr City, Cairo, Egypt | Open to Remote Work

Recent Computer Science graduate (2025) actively seeking a Junior Front-End Developer or Front-End Intern position. Proficient in React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, and Bootstrap to build responsive, accessible, and user-friendly web interfaces with pixel-perfect UI implementation and clean code structure. Experienced in REST API integration, state management using Redux, Zustand, and Context API, and front-end performance optimization techniques including lazy loading, code splitting, and memoization. Committed to writing maintainable, reusable, and well-documented code. Strong collaborator with excellent problem-solving skills, adaptability, and eagerness to learn new technologies. Actively developing real-world projects and contributing to open-source on GitHub, including an ATS Resume Analyzer built with Next.js and Node.js that integrates AI for web development. Motivated to gain hands-on industry experience, contribute to agile teams, and deliver high-quality web applications.

Education

B.Sc. at Suez Canal University – Faculty of Computers and Informatics, Ismailia, Egypt

October 2020 - July 2025

Grade: Good

Relevant Coursework: Data Structures & Algorithms, Web Development, OOP, Databases, Software Engineering

Skills

Core Technologies: JavaScript (ES6+) - React.js - TypeScript - HTML5 - CSS3 - Tailwind CSS - Responsive Design - Git & GitHub

Frameworks & Libraries: Next.js - Redux / Redux Toolkit - Zustand - React Query - Context API - React Hook Form - Framer Motion - Material UI (MUI) - Bootstrap

Tools & Practices: REST APIs - Postman / Thunder Client - Figma to Code - Performance Optimization - Web Accessibility (a11y) - Clean Code & ESLint - Agile / Scrum - Vite - npm - Vercel / Netlify, Server-side

Currently Learning / Familiar: Node.js (Basics) - MongoDB (Basics) - Express.js (Basics)

Projects

ATS Resume Review • ↗

ATS Resume Analyzer is an in-development full-stack AI tool for resume evaluation, with completed authentication, API setup, and file uploads. Future work centers on the AI engine for content extraction, job-matching scoring, keyword detection, and suggestions using real AI models and a custom backend.

Tech stack includes JWT/protected routes, Node.js/Express.js, Multer, MongoDB/Mongoose, React/Next.js, Axios, TypeScript, Tailwind CSS, and Framer Motion.

Event Planner & Finder (MERN Stack) • ↗

Full-stack event management platform with JWT-secured authentication, complete event CRUD operations, real-time search/filtering, and responsive UI using the MERN stack (React.js, Node.js, Express, MongoDB) + MUI and Axios.

Tech stack: React.js, Material UI, Node.js, Express, MongoDB, JWT, MUI, Axios Full-stack event management platform with JWT-secured authentication, complete event CRUD operations, real-time search/filtering, and responsive UI using the MERN stack (React.js, Node.js, Express, MongoDB) + MUI and Axios.

Tech stack: React.js, Material UI, Node.js, Express, MongoDB, JWT, MUI, Axios

Sky – 3D Interactive Weather Application • ↗
Real-time weather dashboard with stunning 3D animated scenes and particle effects

Technologies: React.js, Three.js, React Three Fiber, OpenWeather API

AI Chatbot Web Application • ↗
Built an AI-powered chatbot using React.js and Material UI (MUI) with a responsive UI.

Integrated Google Gemini API for real-time intelligent responses.

Managed global state and chat flow using React Context API.

Implemented light/dark mode theming and improved UX with loading indicators and animations.

Technologies: React.js, JavaScript (ES6+), Material UI, Axios, Google Gemini API

Adhan – Prayer Times Web App • ↗
Responsive Islamic prayer time tracker with automatic location detection and optional notifications

Technologies: React.js, Material UI, Axios, Aladhan API, Geolocation API

To-Do List Application • ↗
Fully responsive task manager with real-time updates and persistent storage

Technologies: React.js, Tailwind CSS, Framer Motion, LocalStorage

Certificates

React.js - Hooks - Redux - State - Router from Udemy
August 2025 • ↗
Mastered core React.js fundamentals, including React Hooks, Redux for state management, and React Router for client-side routing. Acquired hands-on experience through 27.5 hours of practical exercises, developing dynamic and responsive single-page applications (SPAs) and user interfaces. Built interactive, mobile-friendly web applications utilizing modern JavaScript (ES6+), component-based architecture, and best practices for performance optimization.

Database & Programming Fundamentals from Information Technology Institute (ITI)
February 2025 • ↗
Mastered SQL Server for database design, querying, normalization, stored procedures, and data management. Developed proficiency in Visual C# (.NET) for application development, including building database-driven desktop and Windows applications. Completed intensive 60-hour program, consisting of 18 hours of structured lectures and 42 hours of hands-on practical training and lab exercises. Gained practical experience in full-stack database application development, integrating SQL Server backends with C# frontends following industry best practices.

UX/UI Design from Information Technology Institute Summer Training (ITI)
August 2024 • ↗
Mastered UX/UI design principles, including user research, user experience (UX) strategy, user interface (UI) design, wireframing, prototyping, and visual design. Developed proficiency in front-end technologies such as HTML, CSS, and Bootstrap for creating responsive and accessible user interfaces. Gained hands-on experience with industry-standard design tools, including Adobe XD, Adobe Photoshop, and Adobe Illustrator. Completed comprehensive 162-hour intensive training program focused on end-to-end UX/UI processes, from research and ideation to high-fidelity designs and implementation.

Front End Development from Google Developer Student Clubs (GDSC), Suez Canal University
July 2023 • ↗
Front-End Development Trainee – Google Developer Student Clubs (GDSC), Suez Canal University
Successfully completed the Front-End Development course and capstone project “Calm” during the

2022–2023 academic year. Developed responsive and user-friendly web applications using HTML5, CSS3, and JavaScript. Gained hands-on experience in UI implementation, responsive design, DOM manipulation, and best front-end development practices. Collaborated on a real-world project, applying problem-solving skills, code optimization, and version control fundamentals.
